## PRODUCT SETUP FACT SHEET

## WHAT IS BLEED?

When designing for print it is important to remember that it can be difficult to trim a job right on the edge of a design. In order to achieve the best result possible, you will need to extend your design past the trim lines, so the design can easily be cut down to size. The area that extends past your trim lines is called 'bleed'. In order to get the best results when designing for print, it's important to ensure your artwork always extends past the trim lines.

## SNAP FRAMES

## A4 Snap Frame

## GENERIC FACTS:

- Convert all text to outlines
- Embed and flatten all images and transparencies

Set up crop marks and trim lines

- 2 mm external bleed
- If your design has a border, it must be no less than
- 3 mm thick ( 5 mm including bleed)
- File provided in CMYK only unless using an IBS Pantone Colour.
- Our recommended rich black break down in
$40 \% \mathrm{C}, 40 \% \mathrm{M}, 40 \% \mathrm{Y}$, and $100 \% \mathrm{~K}$ (particularly on uncoated
stock - e.g. 100gsm laser)
- Supplied as press ready PDF

## IMPORTANT DESIGN NOTES:

As per industry standard colours may vary up to $5 \%$

- For the best colour accuracy please refer to a Pantone colour guide and not your screen.

## PRODUCT SPECIFICS:

- Size: $210 \times 297 \mathrm{~mm}$ (W x H)
- Size with bleed: $214 \times 301 \mathrm{~mm}(W \times H)$
"For Standard Snap Frame"
- 2 mm external bleed requirement
- 15 mm internal bleed requirement
"For Basic Snap Frame"
- 2 mm external bleed requirement
- 15 mm internal bleed requirement on top \& bottom

## "STANDARD" A4 SNAP FRAME

# SIZE: 210x297 mm (W x H) SIZE WITH BLEED: 214x301 mm (W x H)
